THANK YOU

Thank you for purchasing Purely Holistic Parasite Cleanse. The following guide has been designed to offer a comprehensive insight into human parasites, what they are, what they do and how to stop them. We hope to arm our product users with the knowledge to understand what is threatening them, and how our product works to eliminate these threats.

LEGAL STUFF!

Before we get started on the Parasite Cleanse we have to make you aware of the usual legal disclaimers.

All rights reserved. No part of this publication may be reproduced, distributed, or transmitted in any form or by any means, including photocopying, recording, or other electronic or mechanical methods, without the prior written permission of the publisher, except in the case of brief quotations embodied in critical reviews and certain other non-commercial uses permitted by copyright law. Purely Holistic
616 Corporate Way #2
Valley Cottage
New York
NY 10989

This booklet is for informational purposes only and is not intended as a replacement for medical advice. We always advise consulting a medical professional.

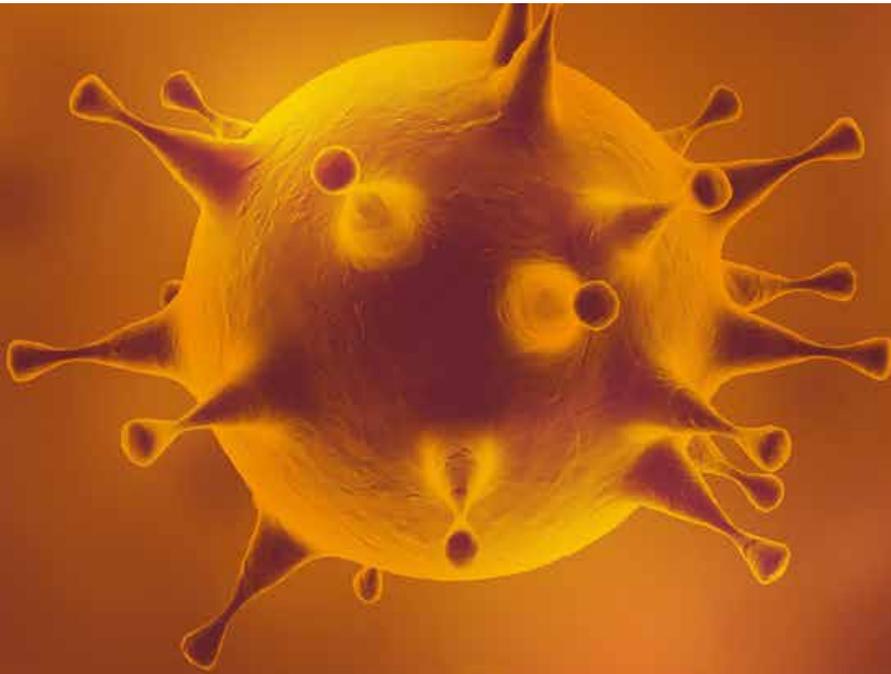

Before using the Purely Parasite Cleanse please read the label fully as it may not be suitable for you depending on allergies, pregnancy and age.

Ok that's the boring legal stuff out of the way let's get down to helping you rid yourself of your Parasite symptoms.

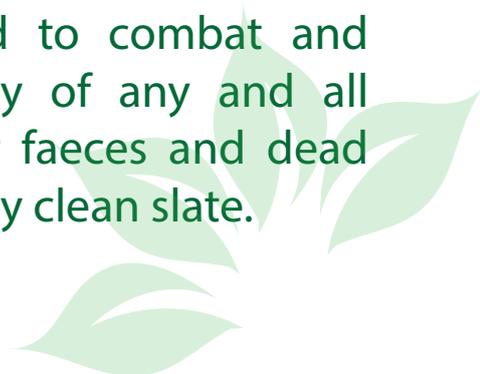

PARASITES: WHAT ARE THEY?

Parasites are living organisms that live inside other organisms (its host), often unbeknownst to their host, deriving nutrients at their expense. Parasites are the most populous living organisms on earth, and can feed on and live in the blood, flesh, or food of the host, and can spread in a surprising number of different ways.

Parasites are split into two main groups: exoparasites, that live outside the host and simply feed upon them for a short time; these include mosquitoes, bed bugs and fleas; and endoparasites, which use the host as their living environment for their entire life. These include worms, protozoa and even certain bacteria and viruses. ***These can live in the stomach, intestines, blood vessels, or even between the cells of the body.***

Purely Holistic Parasite Cleanse is designed to combat and eradicate endoparasites, and clear the body of any and all unwanted hijackers, as well as clearing their faeces and dead bodies from a user's system, to give them a truly clean slate.

PARASITES: WHAT ARE THEY?

The most common of these include:

Toxoplasma – More than 60 million men, women and children in the US carry the protozoan parasite *Toxoplasma gondii* – the highest levels anywhere in the world. Studies have shown that these parasites alter behaviour in other mammals, and can even contribute to neurological disorders.

Pinworms - A pinworm infection is an extremely common infection in which tiny worms infest the intestines and lay eggs around the anus. Pinworm infections are highly contagious, therefore all members of your household should be treated for an infection simultaneously to avoid a recurrence.

Round Worms - Infect more than a billion people all around the world, and while not lethal, cause serious and prolonged ailments, and can grow to up to a meter long.

Tape Worms – Tapeworm eggs are often found in raw meat, and can grow between nine and fifteen meters in length, going undetected until they cause serious problems. Tape worms have been found nesting in the heart, lungs and even brains of some victims with lethal consequences.

Giardia – Often transmitted to humans from animals and other humans who are symptomless carriers, these parasites cause severe gastrointestinal distress.

Cryptosporidium – Also infects both humans and animals, and primarily spreads via water sources. It is a leading cause of waterborne disease in the United States.

WHERE DO THEY COME FROM?

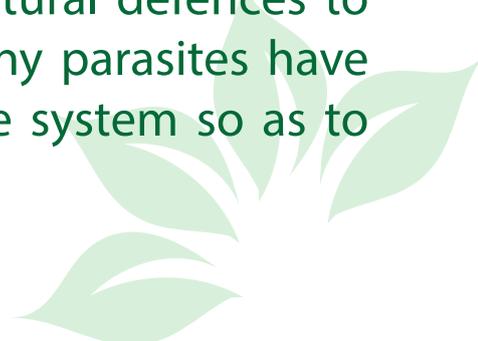

Parasite eggs are microscopic, and easily transmitted through bodily fluids and excrement. The difficulty with identifying microscopic eggs is that they could be anywhere

Scenarios in which people could unwittingly become affected include swimming in public pools, where just one infected individual might pee in the pool – the chlorine kills bacteria, but not unhatched eggs. Swallowing just a tiny amount of water could result in infection.

Equally, someone failing to wash their hands after a bathroom break and touching a communal surface can easily result in the eggs being picked up by others, who could then unwittingly ingest them while eating chips or other finger foods.

Some eggs are even small enough to become airborne, meaning they can travel freely on the flow of an AC system, surviving for up to two days out in the atmosphere before being inhaled or swallowed by a host.

Simply put, ***it is almost impossible for humans to avoid coming into contact with parasitic eggs at some point in their lives.*** The immune system deploys natural defences to eradicate harmful bacteria and viruses, many parasites have evolved to be undetectable to the immune system so as to survive.

WHERE DO THEY COME FROM?

Parasites can carry with them more than 240 communicable diseases that can affect individuals, but this form of parasite-to-host infection is more common in the tropical regions of South America, meaning travel is a common way for people to start feeling under the weather, but unsure of how they may have become ill, even if they only drank bottled water. Water, even from a tap, can carry many foreign parasite eggs in other countries, where filtration is operated differently.

Equally, the importing of fruits and vegetables from abroad can help more exotic parasites that our immune systems are ill equipped to cope with being transmitted. Imported fruits and vegetables are subject to some regulation, but international growers may not use the same pesticides and cleaning procedures as American growers, leaving consumers vulnerable.

Dogs, cats and other animals are all viable hosts for parasites which can then be communicated to humans – a dog enthusiastically licking someone's face may look cute, but could transfer hundreds of parasite eggs in the process.

Because parasites can live in between the cells of living creatures as well as in their bloodstream, meat products are also commonly infested with parasites. If the meat is not properly cooked, these parasite eggs will survive and be ingested, to start life in a new human host.

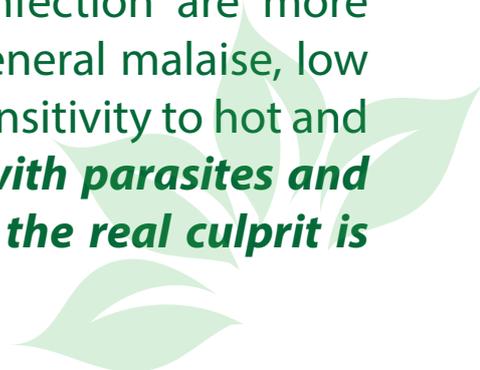

WHAT ARE THE SYMPTOMS OF INFESTATION?

Symptoms of an infestation depend on the type of parasite and where it lives in the body. Worms can cause constipation, diarrhoea, bloating, Irritable Bowel Syndrome and even ulcers as their presence disrupts the digestive ecosystem. Intracellular parasites can cause joint and muscle pain, skin conditions like eczema and even chronic fatigue, while those living in the bloodstream can cause anaemia, tumours and even affect brain function, causing sleep disorders, nervousness and ticks like teeth grinding.

The most common symptoms of parasitic infection are more subtle however, and account for feelings of general malaise, low energy and mood, drowsiness and fever-like sensitivity to hot and cold. ***Many people live for months infested with parasites and simply blame themselves for lethargy when the real culprit is breeding inside them.***

HOW DO I GET RID OF THEM?

Using Purely Holistic Parasite Cleanse is a great way to be gentle on your body while being tough on parasites. The 1,425mg formulation includes more active ingredients than any competitor, while the 120 capsule container means individuals can successfully perform two full cleanses for the same price as one from a competitor.

The active ingredients in the formulation have been specially prepared and combined to create the ultimate solution for killing parasites.

Black Walnut Hull Powder – Black Walnut Hull contains oil, mucilage, albumin, mineral matter, cellulose, and water, and it contains the highest concentration of Iodine of any part of the nut. Providing potassium, magnesium, manganese, sulphur, copper, and silica; this powder is a potent anti-parasitic that effectively eliminates a host of unwanted microbes from the bowel, while promoting the healing of inflamed tissues.

Blueberry Leaf – Blueberry leaf contains high concentrations of powerful antioxidants including anthocyanosides, most notably quercetin and hyperoside. These effectively cleanse the bloodstream of build ups including LDL cholesterol, plaques and dead platelets, and have been found to offer an effective means of counteracting blood-borne parasites.

HOW DO I GET RID OF THEM?

Oregon Grape Root Powder – Oregon Grape rhizome has been found to stimulate the liver and kidneys, as well as provide an effective treatment for psoriasis and other skin conditions, relieve digestive conditions and even strengthen bone marrow, making it the perfect factor to generate a hostile environment for intracellular parasites. The root contains a wide range of beneficial alkaloids that help people recover more quickly from chemotherapy and other aggressive treatments.

Wormwood Herb Powder – Wormwood is the heavyweight of the anti-parasitical herbs, containing two volatile isomers of camphor, in the form of terpenes alpha and beta-thujone. Wormwood has been used since Roman times to eradicate parasites, as its interaction with the body creates a hostile environment that makes it impossible for them to live.

Butternut Bark Powder – Butternut Bark Powder is a mild laxative used in First Generation American medicine for purging parasites, and is most famous as a tapeworm remedy, though it is an effective vermifuge for a wide variety of worms.

Garlic Bulb Extract – This is another powerful remedy for conditions of the blood and stomach, and has been included to promote the health of the cardiovascular and digestive systems, helping people heal effectively in response to the purge.

HOW DO I GET RID OF THEM?

Pumpkin Seed Powder – High in Magnesium, Zinc and alpha-linolenic acid (ALA), pumpkin seeds contain high levels of those nutrients most essential to vitally important physiological functions, from the body's ability to produce energy to creation of RNA and DNA. This powder helps energize the body to recognize and fight off the foreign bodies.

Pau D' Arco Bark Powder – Pau D'Arco is a South American tree whose bark contains high levels of quinoids, benzenoids, and flavonoids that create hostile effects for parasites. Its bark has been used as a natural remedy for 1,500 years to fight infections, including yeast infections which are actually a form of parasitism.

Papaya Fruit Powder – Papaya is a superfood packed with vitamins, minerals and enzymes, and the important active ingredient papain. Papain is used to break down cells and clean up dead tissue, and is optimized for cleansing the body of the die-off associated with a clearing out of parasites.

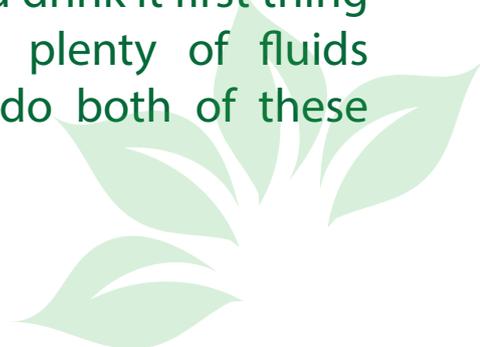

PREPARING FOR A PARASITE CLEANSE

To get the most out of a parasite cleanse you must first clean out your body as best you can.

If you start to clean out your body before you cleanse that's great. Try to eliminate processed foods, and also drink a glass of lemon juice with water three times a day. To make the lemon juice, simply squeeze 1 lemon in a glass of water, and drink it first thing in the morning. Also stay hydrated, drink plenty of fluids throughout the day. You can carry on and do both of these throughout the entire cleanse.

PREPARING FOR A PARASITE CLEANSE

Try this for a few days, then start the actual parasite cleanse.

Take **two** capsules **three** times a day preferably with meals, we recommend taking with breakfast, lunch and evening meal. Make sure you take six pills a day every day for the full 10 days. Always check the allergy information and consult your physician before committing to a course of treatment. Once undertaken, drink plenty of water throughout the day to stay hydrated and flush out the parasites.

Purely Holistic's parasite cleanse contains 120 capsules so you have enough for 2 complete cleanses.

We recommend that you leave at least 3 months between cleanses and always seek the advice of a healthcare professional if you are unsure about taking this supplement.

WHAT DO I DO NEXT?

This unique formulation also includes ingredients designed to raise the acid levels in the body so that any parasitic eggs that may be hosted during the cleanse do not find the right conditions to hatch and will instead be flushed through. For this, we use a special combination of Cranberry, Zinc, apple pectin fruit powder and carrot root powder to naturally eliminate the alkali states that parasites thrive in.

Staying hydrated, drinking bottled water and ensuring scrupulous personal hygiene in the home and at work will help prevent further infestation. Remember – parasitic eggs can live for days under the fingernails ready to be transported into your food.

With 120 capsules packed with 1,485mg of active ingredients produced exclusively in the USA according to Good Manufacturing Practices with a 100% money back guarantee.

FREQUENTLY ASKED QUESTIONS

Will this cleanse get rid of Candida?

No. A Parasite Cleanse does not target the same bacteria as a Candida Cleanse. Go to amazon and search for our best selling Candida Cleanse, simply go to amazon.com and search for Purely Holistic Candida Cleanse.

Can I take after a Candida Cleanse?

Yes. You can take a Parasite Cleanse after a Candida Cleanse but we recommend a gap of 10 days between supplements and consult a healthcare professional if you have any concerns.

Is the Purely Holistic Parasite Cleanse non GMO?

Yes. The formula uses non GMO ingredients.

What is the source of the Gelatin used in the capsules?

The gelatin used in the Purely Holistic capsules is bovine (derived from cattle).

Your bottle contains 2 treatments, how long should I leave between treatments?

We always recommend seeking the advice of a healthcare professional and would suggest that you do not start a second cleanse until 3 months after the first cleanse.

FREQUENTLY ASKED QUESTIONS

Is the Purely Holistic Parasite Cleanse Kosher?

No.

What die-off symptoms can I expect?

The die-off symptoms of parasites can include weakness, fatigue, pain and emotional instabilities. The symptoms begin as soon as the parasites start to die and usually last until they are eliminated.

Some of the symptoms are directly associated with the parasites becoming restless and moving around in the body, while other symptoms are the result of the cleanse taking action.

Does the Black Walnut Hull Powder contain Iodine?

Yes. If you are allergic to Iodine seek advice from a Healthcare Professional.

THINGS TO REMEMBER

- Stay well hydrated
- Avoid processed foods if possible
- Drink homemade lemon juice 3 times a day
- Ensure hands are cleaned thoroughly at every opportunity
- Take Purely Holistic Parasite Cleanse 3 times per day, 6 capsules per day for 10 days
- Be prepared for die off symptoms – it means the supplement is working!
- Consult your doctor if symptoms persist

We hope this guide has helped you to understand Parasites, their causes, effects and treatment, and we look forward to helping you restore your natural balance with **Purely Holistic Parasite Cleanse.**
